

Lumini Aqua System

150W Gemis 150R3

LCD Display

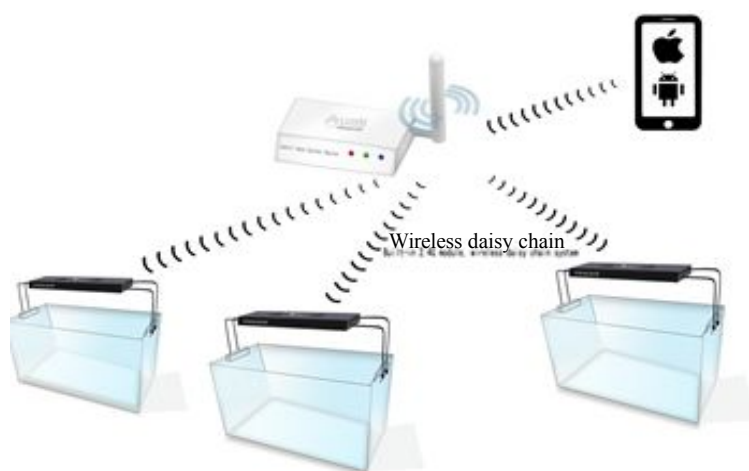

Features:

- ❖ UL approved MeanWell driver
- ❖ Wifi remote control on PC or Android phone
- ❖ 4 separate adjustable channels, timing and dimming
- ❖ 100% modular design, low cost maintenance
- ❖ Advanced LCD display to indicate the working status
- ❖ LED 60/120 mix degree optic lens and acrylic panel to provide high light transmittance
- ❖ Simulating all weather patterns including sunrise, sunset, cloud, storm, and lunar cycle
- ❖ Passive cooling and PWM Smart fan to control speed and noise, optimized heat dissipation

Lumini Smart Control System

PMW & DMX Tech

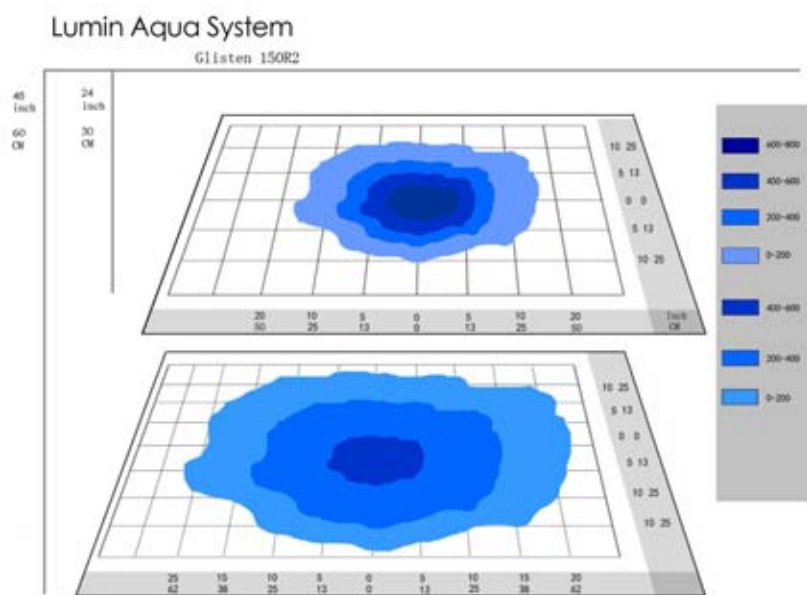

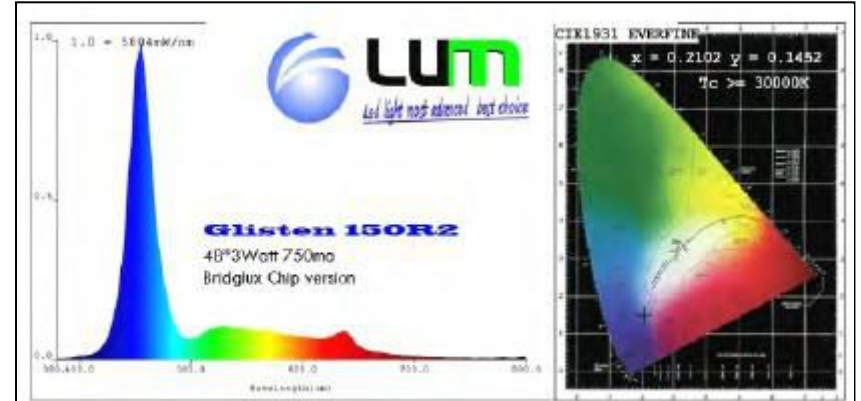

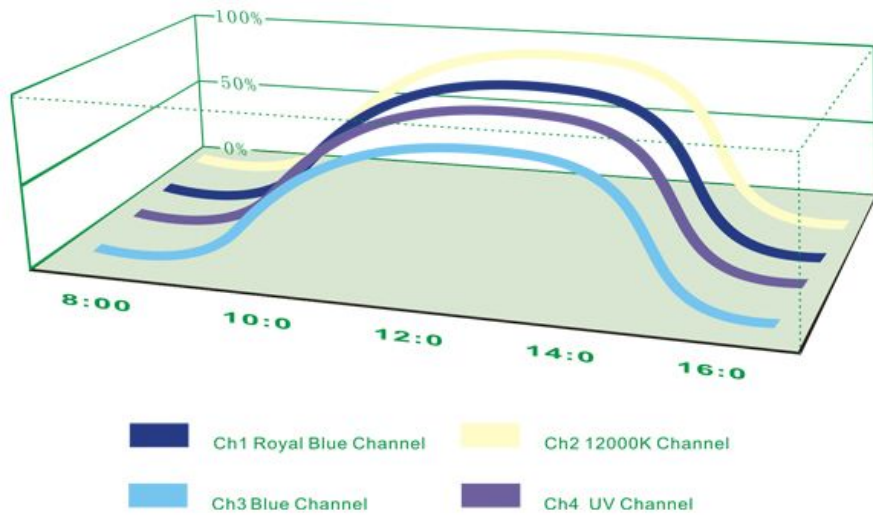

Wifi Control

We use the newest and most popular technology DMX and PMW controls. 4 channels, timing and dimming, Auto, Manual, Thunderstorm, Moonlight working mode, with a 2.4 GHz Wifi wireless remote control. Our control is intelligent, daisy chain is compatible, lets your coral grow using automated parameters.

Spectrum

The Gemis 150R3 has four separate channels to control 100% of the usable light spectrum. Each channel has separate dimmer and timer to achieve a greater effect, you can customize the spectrum by yourself.

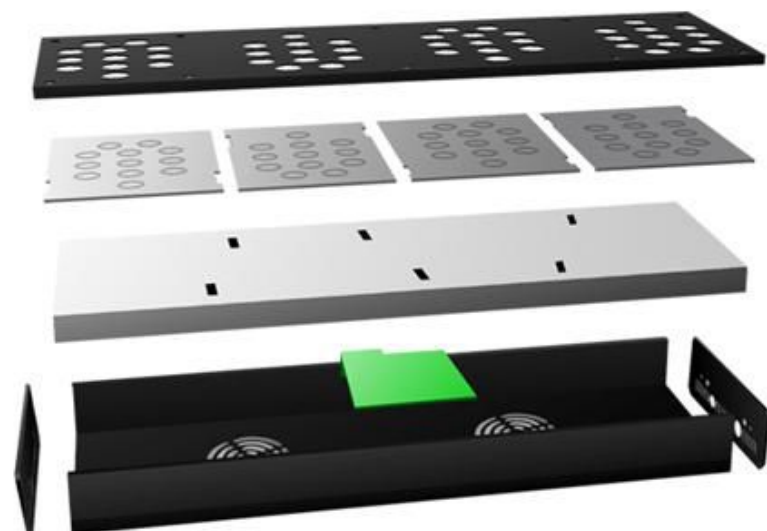

Intensity

We use full 3w high power Bridglux chips, these high intensity LEDs are combined with the use of 60/120 mix degree lens, providing high light transmission levels. Giving amazing results!

Upgradability

We know how important your investment is. We've designed the Lumini Gemis 150R3 to be forward thinking, and allow for upgrades as the technology progresses. Like personal computers, LED technology is advancing rapidly. The Lumini Gemis 150R3 is completely modular designed, allowing to be upgraded as desired.
