

LuminiGrow Dank 600

GROWTH

LuminiGrow Dank 600 is the most cost effective way for growers to boost healthy crop yields. Supplying the compatible light spectrum which is 100% absorbed by the plant.

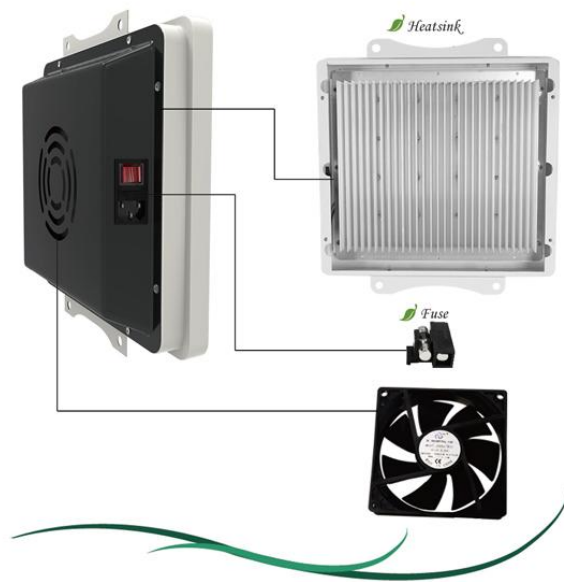

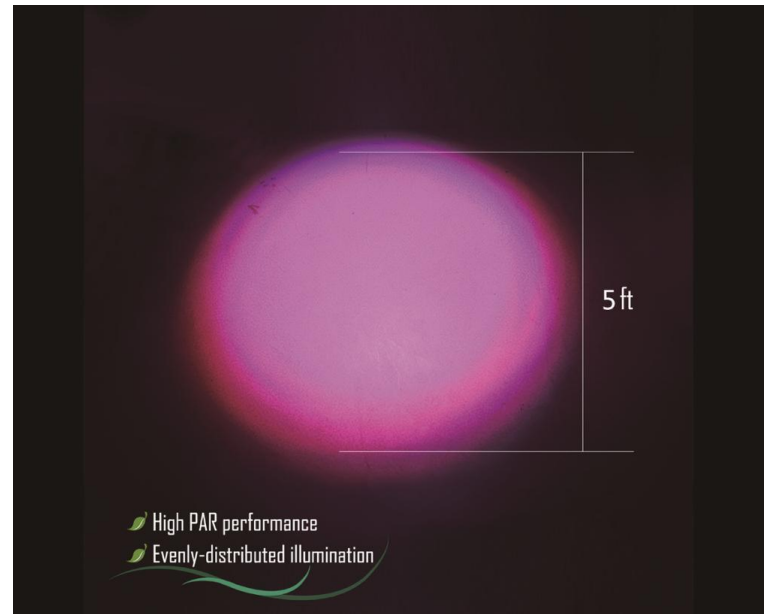

FULL SPECTRUM

Range from UV to Infrared, the spectrum has been designed carefully to deliver the most photosynthetically useful light to plants after extensive testing, 100% usable and efficient for your plants, it has the biggest contribution for plants and useful for increasing the harvest.

ENERGY EFFICIENCY

Comparable to traditional 600 watt HPS/MH while consuming only 145 watts! Perfect for a 5'x5' growing area at 48" height. The 540W indoor grow light utilizes high-quality 90pcs 6W dual-chip LED(each chip 3w) with longer lifespan, ensure high luminous output for plants'absorption, it's the most effective way for growers to boost healthy crop yields.

SAFE COOLING SYSTEM

Quality aluminum cooling heat sink(3.0mm) and one quiet fan for effective heat dissipation. Large heatsink(7.5"x 8.66") to cool the leds and maintain long lifespan of led grow light, no extensive heat extractor systems are needed. This growing light is ideal for all kinds of indoor plants veg and flower at all growth stages.

LEDs

- 12 pcs Blue 6W dual-chip LEDs
- 12pcs Deep Red 6W dual-chip LEDs
- 2 pcs IR 6W dual-chip LEDs
- 34 pcs Red 6W dual-chip LEDs
- 7 pcs warm white light 6W dual-chip LEDs
- 3 pcs cool white light 6W dual-chip LEDs
- 9 pcs Royal Blue 6W dual-chip LEDs
- 9 pcs day night 6W dual-chip LEDs
- 2 pcs IR 6W dual-chip LEDs
- 2 pcs UV 6W dual-chip LEDs
